ELK PRODUCTS ANNOUNCES REDESIGN OF TWO-WAY WIRELESS KEYFOB

ELK Products, a premier manufacturer of security and automation solutions, is pleased to announce the new and improved design of the ELK-6010 two-way wireless key fob. ELK's industry leading two-way technology provides advanced features to ensure reliability and overcome the vulnerabilities associated with conventional one-way wireless technology. Utilizing cutting-edge techniques to defend against interference, hacking, and jamming, ELK's two-way wireless products offer a more secure and dependable wireless solution.

The new ELK-6010 four button key fob boasts a compact design that is smaller than many key fobs on the market. The unique info key may be pressed by user to see status before entering the premises indicating: alarm activated, armed, or disarmed. Other keys allow arming, disarming, or panic. In addition, the ELK-6010 now features a replaceable 3V battery for added convenience.
