ELK PRODUCTS ANNOUNCES REDESIGN OF M1 ZONE TEMPERATURE SENSORS

ELK Products, a premier manufacturer of security and automation solutions is pleased to announce a new and improved design of the M1 Zone Temperature Sensors! This new design features an attractive housing and the elimination of the RJ-45 probe connection. The ELK-M1ZTS now features a concealed internal temperature sensor, while the ELK-M1ZTSR features a 7 foot remote probe with connections hidden under the housing. The ELK-M1ZTS and ELK-M1ZTSR measure temperatures from -50° to 120° F (-46° to 48° C). These versatile temperature sensors allow M1 systems to monitor conditions and provide notification of unacceptable temperatures in server rooms, commercial coolers/freezers, wine cellars, second homes, animal habitats, and more.
