For Immediate RELEASE

Compass Control® Technology Now Compatible with ELK Products' M1 Security and Automation Control Systems

Bi-directional driver gives integrators a plug-and-play solution

Mount Vernon, NY. Key Digital, Inc. –Key Digital, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that ELK Products' M1 Security and Automation Control Systems are now compatible with the Compass Control System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

ELK's M1 Controls incorporate security, fire, door entry control, and energy & task management to provide total control of home or business. The M1Gold offers a truly integrated solution. This IP accessible system offers simple, yet powerful on-site and remote user interfaces, giving the consumer full control anytime, from anywhere.

The M1 Gold's built-in voice dialer can call up to 8 phone numbers and alert owners of status changes; such as, critical temperature levels, water leaks, children arriving home from school, etc. Built-in telephone remote control allows you to control temperature settings, water heater, garage door, lighting, and sprinklers plus arming/disarming system and more; by simply picking up the phone – any phone. Integrators and Installers will value the flash memory firmware, RS-232 serial port, Ethernet connectivity option, and PC programming in English text.

Visit Key Digital at CEDIA EXPO Booth 420 and ELK Products at booth 580.
